

Medialoghôtel

To manage
your business
from A to Z
with peace
of mind

A hybrid SaaS Cloud software solution

Medialoghôtel PMS is an innovative software adapted to the needs of your establishment to support and optimize all of your hotel management.

Its hybrid local and SaaS Cloud architecture ensures flexibility, performance and security for your company's business.

This novel technology guarantees non-stop performance of the PMS whatever the quality of your IT environment: permanent access in case of a breakdown of the Internet network or if your local server fails.

It provides for secure management of data that are synchronized and reproduced 24h/24h and stored simultaneously in the distant (SaaS) and local server.

A comprehensive and modular business application

Medialoghôtel can be adapted to any kind of establishment, whether individual or multi-property, at the scale of your business.

The software has a multi-task and multi-user infrastructure with Front Office and Back Office.

For even more effective services, the PMS offers access to complementary applications or modules to help you make decisions related to the development of your business.

With Medialog, you know you are choosing the solution that brings real added value to your business.
